

## BarDIMM Pro

Supported Devices List – September 2019

### List of HP printers and MFPs supported by BarDIMM Pro

The following list is only for HP printers that support the internal BarDIMM Pro firmware solution.

Printer Model	Part	Printer Model	Part
CLJ 3000(1)	JM30100U	LJ M633mfp	JM30100X
CLJ 3800	JM30100U	LJ M651	JM30100F

**Note:**

- \* Requires 4.8.1 firmware version minimum
- Cable adapter for some printers without USB connector (JM30100X)
- N/TN/DTN/DN/X/XH versions of these printers are also supported.
- Printers must have one host USB slot available for this solution.
- Other printer models may be supported in the near future. Please contact us if you need more information.
- Older devices can be supported using the BarDIMM Box,
- Larger Fleets can be supported by BarSTORM VM (Virtual Machine).
- BarDIMM Pro modules are specific to the printer model and cannot be plugged into other models.

**Other Printers & MFPs** with full PCL5e language capability can benefit from BarDIMM features using Single printer [BarDIMM Box](#) or Multi Device [BarSTORM VM](#) solutions.

## Release notes

2nd of January 2019

### **Compatibility with HP Futuresmart 4.7.1 and newer**

Firmware 4.7.1 introduces a new security where print solution packages need to comply with a new code signature mechanism to be installed. BarDIMM Pro 8.4A1 and newer versions include that new mechanism.

If BarDIMM Pro was installed prior to the printer upgrade to HP Futuresmart 4.7.1 then you don't need to update BarDIMM as the new mechanism controls the installation of the solution.

For all other cases you need to upgrade the BarDIMM Pro USB stick to version 8.4A1.

### **More than one solution installed in the HP printer?**

If you have more than one solution in a HP LaserJet Enterprise with Futuresmart 4.x firmware, BarDIMM must be the first solution that's installed, otherwise the printer won't run BarDIMM code after the reboot and no barcode will be printed. This problem did not appear with Futuresmart 3, the workaround is to ensure BarDIMM is installed first.

### **Q&A**

Q: What happens if I don't use BarDIMM Pro 8.2 20171117 or newer with the HP FutureSmart 4 firmware?

A: BarDIMM Pro will be installed but will not license itself, "BarDIMM demo" will be printed across pages with barcodes

Q: Can BarDIMM Pro BarDIMM Pro 8.2 20171117 or newer for FutureSmart 4 also work on HP printers and MFP with FutureSmart 3 firmware?

A: Yes it does
